Answer key:

Did you know <u>lightning</u> can <u>strike</u> from up to 15 miles away? It is <u>dangerous</u> to be outside during a <u>storm</u>. A good rule to remember is "When <u>thunder</u> roars go <u>indoors</u>." Go inside a house or a <u>building</u>, or a hard top <u>car</u>. Never seek shelter under a <u>tree</u> or pavilion. Wait at least 30 <u>minutes</u> after the last roar of thunder to head <u>outside</u>.
